**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Troy Smith on December 22, 2010.

The application has been amended as follows:

**IN THE CLAIMS:**

139. (Currently Amended) A ~~tangible~~ non-transitory computer readable medium having instructions stored thereon, the instructions comprising:  
instructions to generate varying key bits; and instructions to encode the varying key bits in a digital signal as a watermark with reference to at least characteristics of the digital signal.

141. (Currently Amended) A tangible computer-readable medium having instructions stored thereon, the instructions comprising:  
instructions to generate varying key bits; and instructions to steganographically encode a digital signal using the varying key bits.

142. (Currently Amended) A ~~tangible~~ non-transitory computer-readable medium having instructions stored thereon, the instructions comprising:

instructions to map key information to effect an encode/decode map; and instructions to encode a watermark in a digital signal using the encode/decode map and characteristics of the digital signal.

144. (Currently Amended) A ~~tangible~~ non-transitory computer-readable medium having instructions stored thereon, the instructions comprising:  
  
instructions to generate a noise signal as a function of at least one variable which depends on key and processing state information; and instructions to provide the generated noise signal as watermark information.

***Allowable Subject Matter***

Claims 11-13, 16, 63-65, 66-68, and 134-144 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for encoding watermarks in a signal. Independent claims 11 and 139 each recite the uniquely distinct features of "generating varying key bits; and encoding the varying watermark key bits in the digital signal as a watermark with reference to at least using the characteristics of the digital signal." Independent claims 12, 140 and 141 each recite the uniquely distinct features of "generating varying key bits; and steganographically encoding the watermark digital signal using the varying watermark key bits." Independent claims 13 and 142 each recite the uniquely distinct features of "mapping key information to effect an encode/decode map; and encoding the watermark in the digital signal using the encode/decode map and characteristics of the digital signal". Independent claims 16,

143 and 144 each recite the uniquely distinct features of "generating a noise signal as a function of at least one variable which depends on key and processing state information; and providing the generated noise signal as watermark information".

Independent claim 63 recites the uniquely distinct features of "a generator for generating a pseudo-random key; and an encoder for encoding a watermark in the digital signal using: i) the pseudo-random key; and ii) characteristics of the digital signal".

Independent claim 66 recites the uniquely distinct features of "a processor: i) to map mapper pseudo-random key and processing state information to effect an encode/decode map; and ii) to encode a an encoder for encoding the watermark in a digital signal using the encode/decode map and characteristics of the digital signal".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
